eska®

GLOVE REVOLUTION SINCE 1912

POLICE & SPECIAL FORCES

RESEARCH AND DEVELOPMENT

The operational areas and operations of the individual armies vary around the world and change over time. So do the climate zones and weather conditions. This makes the individual adaptation of operational gloves to the actual needs of the respective country and troops all the more important. In order to always meet the requirements precisely, we at ESKA work in a solution-oriented manner and in close coordination with the respective client. We are the contact for the conception and development of military gloves according to country-specific and individual requirements.

OUR 3-STEP PLAN

1 EVALUATION

From the very beginning, personal contact with the client is what counts for us. Througha intensive exchange of experience and lively communication, optimization potentials can be identified and solutions can be developed in a targeted manner.

The individual requirements of the respective customer become the focus of the discussions. Emergency forces bear immense responsibility and must have a firm grip on every situation.

The demands on protection, functionality and tactility are enormous worldwide and yet so different.

2 DEVELOPMENT

Now it's a matter of finding the right materials and cuts for the glove in question. For a combat glove, sensitivity, grip and protection are most important, while a cold-wet-finger glove is expected to provide warmth, wetness protection and robustness.

The requirements for raw materials and cut shapes are correspondingly different. Together with our innovative partners, we develop high-performance materials, individually adapted to the requirements of the respective customer.

3 TESTING

Practical and field tests now lead us step by step to exactly the product that is really needed by the armed forces in the field. We evaluate each feedback together with the client.

Depending on the complexity of the task, it may well make sense to return to step 2 and then carry out further tests.

We leave nothing to chance and pay meticulous attention to every detail.

INDIVIDUAL OPERATIONS AND REQUIREMENTS.

DEXTERITY AND COMFORT.
FOR EVERY CHALLENGE.
FOR EVERY SITUATION.

UNCOMPROMISED HAND PROTECTION.

High-quality, rigorously tested European raw materials and our expertise spanning more than 110 years form the basis for the manufacture of our high-quality products. Our gloves offer the highest level of protection and impress with their perfect fit, maximum grip and exceptional comfort. After all, equipment that not only protects, but also feels precise and is a pleasure to wear boosts motivation, safety and performance in the field. These quality principles are at the very heart of our DNA. We are convinced that investing in high quality is not only more sustainable for the environment, but also more cost-effective. Durable products offer soldiers maximum safety with every movement and reliability in daily operations, reduce wear and tear as well as the need for premature replacement, and ensure consistently high performance even under extreme conditions.

> *The protection of your hands has top priority for us and will never be left to chance.*

TÜV AUSTRIA ZERTIFIZIERT

ABOUT ESKA

Founded in 1912, we have been producing gloves exclusively for more than 110 years. Due to this long experience, we have become the absolute specialist with the highest technical know-how in the production of gloves.The company is already in its fourth generation as a family business.

Our credo is to offer adequate and thus best possible protection to the most elementary and valuable of all executive instruments of the human mind - the hand. Optimum tactility, fit and wearing comfort are just as unalterably part of the company standards as the use of specific and high-quality materials. ESKA has been involved in the development of gloves for the military and police since the company was founded. From the very beginning we have been working intensively on highly technical developments.

We have the expert human resources, production resources and also external resources such as close cooperation and development partnerships with material suppliers to meet your requirements. We also set new standards in this sector and drive developments with a high degree of innovation. All gloves can be modified in cut technic, shape, material composition and design according to the individual customer requirements.

QUALITY FROM AUSTRIA

The company headquarters in Thalheim, Austria is the hub for administration and all logistics. In addition to a small series and sample production, the internal research and development department is also located in Wels. All raw materials are delivered and checked in Thalheim before further processing. All products undergo strict quality controls. Quality management is certified according to ISO 9001:2015. To ensure safety-relevant factors, additional tests are carried out in independent, accredited laboratories.

Ongoing internal and external controls guarantee compliance with all standards and the perfection of all products. All our own production facilities and partner companies in Hungary employ trained glove makers and specialized seamstresses throughout. Our production in Hungary is certified according to ISO 9001:2015 quality commitment, ISO 14001:2015 environmental management and NATO quality standard AQAP 2120.

Through innovative working methods and expert knowledge, in combination with the world's best raw materials from renowned manufacturers, we produce gloves that are unique in the world market.

The goal is to find a perfect solution for every technical problem. In cooperation with our suppliers we are constantly searching for innovative materials to develop new, trend-setting gloves.

TRY IT. WEAR IT. (G)LOVE IT.

Customers on all six continents trust ESKA® to protect their hands under the toughest operating conditions. The close and long-standing cooperation with this worldwide network of professional customers is both an incentive and a challenge every day to jointly develop the best products in each case. It is not without reason that customers appreciate the flexibility, loyalty, innovative strength, reliability and premium quality of ESKA®.
